RODÉOSTOP® + KIT A1

THE SAFEST AND MOST RELIABLE AUTOMATIC FALL ARREST DEVICE

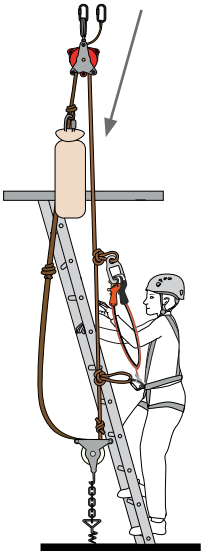

AUTOMATIC FALL ARREST DEVICE WITH ENERGY ABSORBER

Can also be fitted with a counterweight

Make sure the counterweight always holds the rope taut when the user's ascent

- **Its pulley actuates the instantaneous blockage in the 2 directions in case of fall** *(«back-and-forth operation»)*
- If dropped, the device is equipped with a shock absorber to stop the user gently
- Using up to 35 meters depending on the length of rope
- Recommended rope: Semi-static Ø 10,5mm
- **Great maneuverability** *(compact, lightweight ≈1kg)*
- **Maintenance is reduced to send for review each year** *(does not required lubrication)*
- **Norm EN360/2002 A.R.A.**

KIT A1

PULLEY WITH SANDOW & ADJUSTING HOOK ON THE ROPE TENSION CHAIN

- Allows continuous and safe use because it limits the height of fall *(no slack on the rope)*
- A good adjustment of the tension of the vertical line with the hook on the chain down, makes the operation of the system very soft
