

CLiC-it® MOUNTAIN

**Interactive continuous
belay system**

Freedom

CLiC-iT® MOUNTAIN is a communicating, dual-leg lanyard for aerial adventure courses that provides peace of mind to those who climb it and those who run it.

CLiC-iT® MOUNTAIN:

- Provides continuous safety, horizontally and vertically, while allowing full mobility
- Allows you to double or intersect without specific manipulation
- Prevents queuing so everybody enjoy their adventure at their own pace without feeling rushed or slowed down

Simplicity

CLiC-iT® MOUNTAIN is the simplest solution on the market, both for park management and the user.

CLiC-iT® MOUNTAIN:

- Provides easy, one-handed handling, making the adventure even more enjoyable for children 6 years and up.
- Enables the user to actively secure himself, thus keeping the adventurous spirit of climbing alive, while preventing the risk of completely unhooking.
- Can be used immediately on your existing Via Ferrata without costly modifications of your park.

Economic efficiency

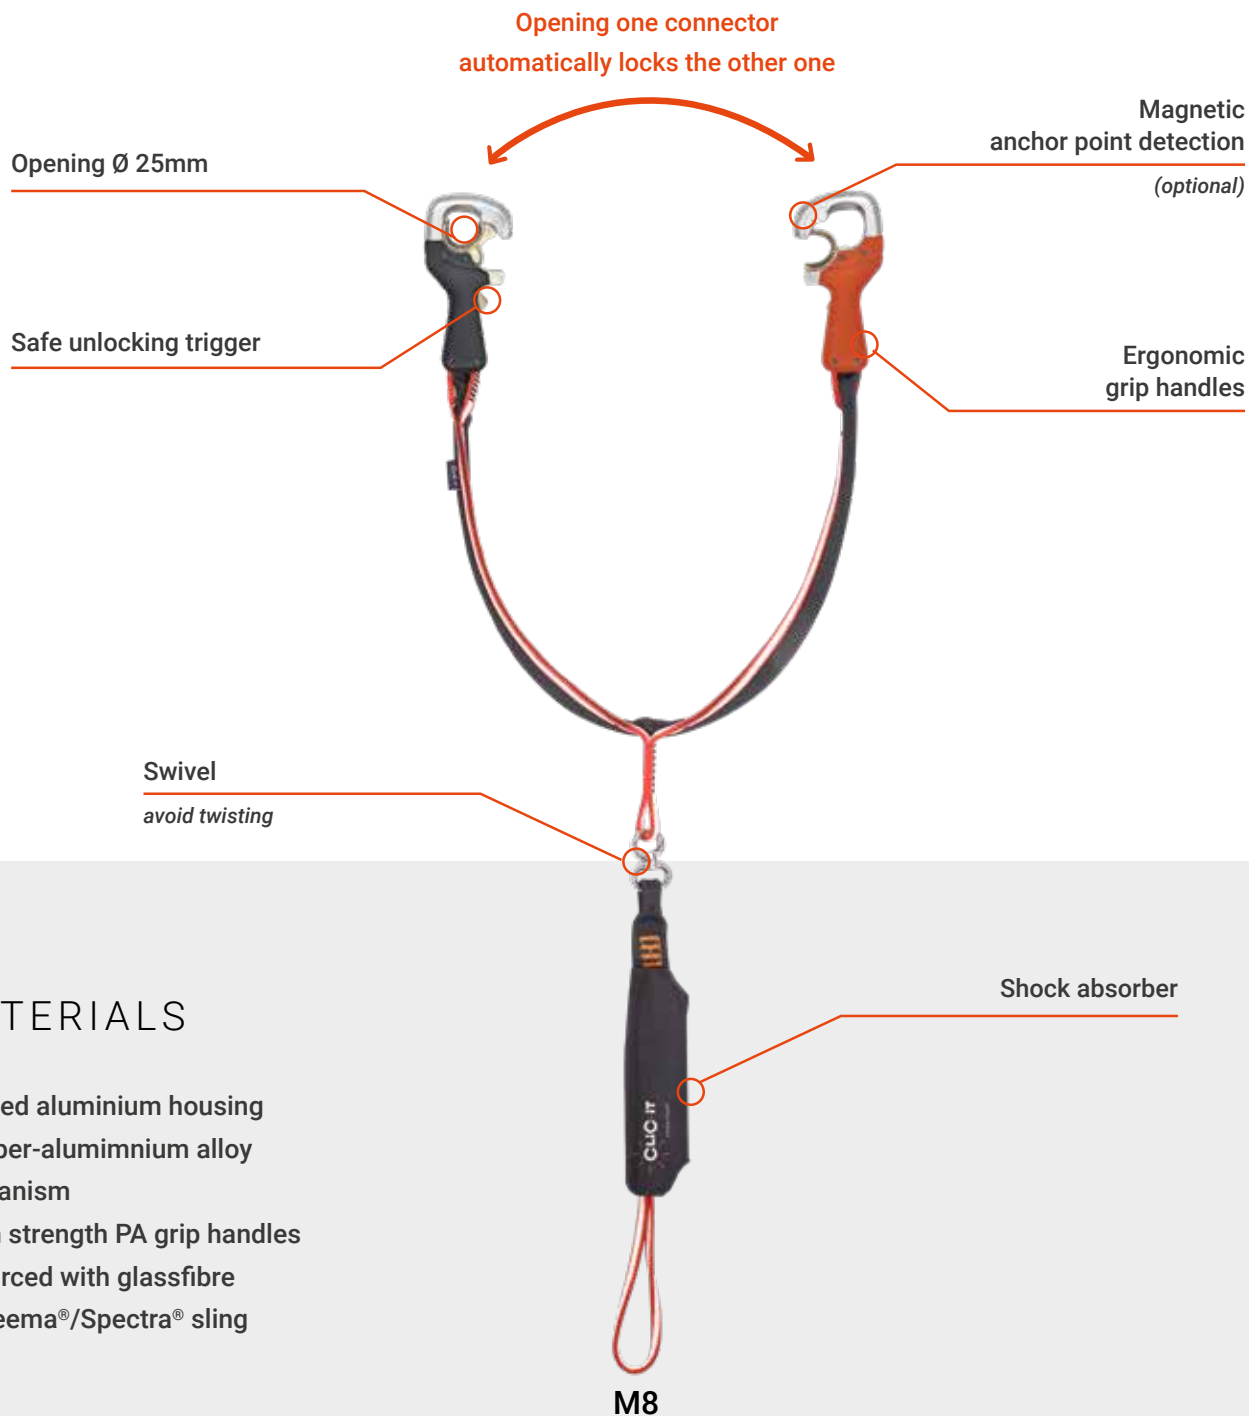

High-grade materials paired with a simple mechanism yield a high life expectancy, making it a cost-efficient and long-term choice.

CLiC-iT® MOUNTAIN:

- Allows for easy inspection and maintenance on site
- Is made up of few moving parts, making it exceptionally durable and reliable, and enabling easy replacement of wearing parts.
- Provides a great foundation to expand the target group to children's birthday parties or school groups

CLiC-iT[®] MOUNTAIN
